Patent No. US20020123614A1
GENERAL INFORMATION:
APPLICANT: Springer, Timothy A.
APPLICANT: Shimacka, Motomu
APPLICANT: Shringer, Motomu
APPLICANT: Lu, Chafen
TITLE OF INVENTION: MODIFIED POLYPEPTIDES STABILIZED IN A
TITLE OF INVENTION: DESIRED CONFORMATION AND METHODS FOR PROD
FILE REFERENCE: CBN-002CP
CURRENT APPLICATION NUMBER: US/09/945,265
CURRENT FILING DATE: 2001-08-31
PRIOR APPLICATION NUMBER: US 60/229,700
FINGREN FILING DATE: 2000-09-01
NUMBER OF SEQ ID NOS: 4
SOFTWARE: FastsEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Indels

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
